

Product Code . LSK-CE-11318

Map software for GPS receiver

Description

Specifications:

The CD-ROM provides worldwide coverage with base-map level detail including the following features:

Political boundaries, cities, towns, major motorways, and/or interstates, and principal highways; lakes, major streams, and rivers; and urban areas and railroads.

Coastline detail which includes many offshore islands, as well as worldwide nautical navigation aids.

Trip and waypoint management functions.

Instructions for use:

The CD-ROM is inserted into a PC, and map software is uploaded to the GPS receiver using a microSD card or PC USB port.
